Education

United Institute of Technology, Prayagraj 2023–2027
Bachelor of Technology in Computer Science & Engineering CGPA: 7.19

Saint John's Academy, Prayagraj July 2022
Intermediate (XII - ISC) 69.0%

Saint John's Academy, Prayagraj June 2020
High School (X - ICSE) 78.6%

Experience

Remote Java Backend Developer Intern @ SkyBrisk Feb 2026 – Present
- Developing scalable RESTful APIs using Java and Spring Boot.
- Integrating backend services with databases for optimized performance.
- Collaborating via Git/GitHub for version control and code reviews.

NRich Learning Aug 2025 – Sept 2025
Full Stack Development Trainee (MERN Stack)
- Built dynamic web applications using MongoDB, Express.js, React.js, Node.js.
- Improved frontend-backend integration through hands-on projects.

United Institute of Technology Aug 2024 – Sept 2024
Python Training Workshop
- Learned OOP concepts and applied them in mini projects.
- Strengthened problem-solving and coding practices.

Projects

Explainable AI for Lung Cancer Detection 2025 – Present
- Working as a **Spring Boot Backend Developer** in a microservices-based clinical decision support system.
- Designed REST APIs to securely route CT scan data between frontend and AI microservices.
- Implemented audit logging, authentication, and data handling for compliance with healthcare standards.
- Integrated backend with a Python FastAPI service using REST for AI inference.
- Supported AI pipeline using YOLO for tumour localization and Grad-CAM for explainable heatmaps.

Bookstore Management API Feb 2026 – Present
- Developed a RESTful API using Spring Boot.
- Implemented CRUD operations with Spring Security and Web libraries.
- Applied version control and documentation practices.

Zerodha Website Clone May 2025 – Aug 2025
- Built REST APIs with JWT authentication.
- Optimized MongoDB queries reducing response time by 25%.
- Developed responsive frontend using React.js.

Climatech Aug 2024 – Sept 2024
- Built a weather forecasting app using Python and Tkinter.
- Integrated external API for real-time weather data.

Technical Skills

Languages: Java, C++, SQL, Python, JavaScript (Basic)
Web Technologies: HTML, CSS, Spring, Spring Boot
Databases: MySQL, MongoDB
Tools: GitHub, Swagger, VS Code, IntelliJ, STS-4, Jupyter, Google Colab
Coursework: Data Structures & Algorithms, DBMS, OOP

Certifications & Achievements

- Cleared internal round of Smart India Hackathon.
- Solved **200+ DSA problems** on LeetCode and GeeksforGeeks.
- Certifications: MERN Stack (NRich Learning), Java (HackerRank), Python (HackerRank).
